# BEFORE AND AFTER RACE PROFESSIONAL CREAM

| Art.8001

## PRE-RACE HEATING CREAM EXTREME WARM-UP HEATING EFFECT CREAM

**PRE-RACE HEATING CREAM** has been formulated to combine the beneficial action of massage with the revitalizing properties of capsaicin which, in addition to acting on the relaxation of muscles and joints, improves local blood circulation.

This cream immediately creates a feeling of warmth that, just a few minutes from application tends to increase. In synergy with capsaicin the warming cream contains camphor that helps the mechanical action of the massage to firm and tone the body. This feature can last up to 40 minutes from application. The warming cream contains ingredients that help athletes before and after competitions to improve or restore muscle tone and is therefore very suitable for those who practice a lot of sport, especially in the coldest periods of the year.

## FAST PAIN RELIEF SPORT ICE GEL

**SPORT ICE GEL** has been studied to give immediate relief to parts of the body caused by greater fatigue and heaviness. Its formulation is based on the combination of Menthol Polar Bear which performs a decongestant action, in synergy with the Mentil Lactate, an ingredient that allows you to keep the feeling of freshness and lightness longer on the skin, giving immediately energy and tone. It is particularly indicated on hot days, after sport and for all those activities that require standing up for many hours of the day.

| Art.8003

## DECONGESTANT GEL RELIEVES TIRED BODY PARTS AFTER INTENSE ACTIVITY

**DECONGESTANT GEL** is a gel studied to give relief to the tired parts of the body, heavy and aching after sporting activities, restoring tone and vigor to the skin and muscles. The high content of red vine (30%), naturally rich in flavonoids, improves microcirculation providing greater oxygenation and nutrients to adjacent tissues. In addition to carrying out the specific function of regenerating and decongesting tissues, it is rich in vegetable glycerine, a polyfunctional substance with important moistening and moisturizing properties. The formulation contains Menthol Polar Bear that thanks to its multiple properties performs the function of refreshing and decongesting affected parts, simulating a slight analgesic effect.

## RELIEVES TRAUMA PAIN, SPRAINS, MUSCLE CONTRACTURES ARNICA GEL 30%

**THE ARNICA GEL 30%** thanks to the high percentage of Arnica tincture (30%), the gel is able to perform an analgesic and decongestant action on the affected part, as well as giving an immediate sensation of enjoyable freshness that helps improve its function. The properties of Arnica make it to all effects a very effective natural anti-inflammatory. Applied to the skin it relieves pain and swelling associated with bruises, sprains, muscle and joint pain. It can be very helpful in reducing pain and promoting tissue healing.

## POST WORKOUT RECOVERY GEL FAST BODY ENERGY REGAIN

**POST WORKOUT RECOVERY GEL** is a special gel containing 30% Echinacea extract that enriches the skin with nutrients and greatly improves its appearance. Its formulation contains a complex of Escin and Centella, always known for their vasoprotective properties that helps eliminate muscle heaviness. The complex of Escina and Centella has been studied in synergy with Cyclodextrin which acts as a vehicle increasing its function. Menthol in crystals completes the effectiveness of the product giving an immediate feeling of freshness and alleviating the perception of heaviness.
